Claims 11 and 14 are presented for examination.

The amendments and remarks filed on August 2, 2010 have been received and entered.

The examiner upon the further review finds claims 11 and 14 not in condition for allowance for the following reasons.

Claims 11 and 14 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Dean et al. (US 6,166,073) in view of Patent abstract of Japan and Hellberg et al. (6,646,001) for the reasons set forth on pages 2-6 of the office action of May 25, 2010.

The examiner had relied on table a and table b for determining the allowability of claims 11 and 14. However, upon further consideration it is the examiner's position that table a and b contain other components such as, crystalline sodium dihydrogen phosphate, sodium chloride, diluted hydrochloric acid, sodium hydroxide and purified water at certain concentrations. However, the claims of the instant application do not contain such components. Therefore, it is not clear that without the addition of the above ingredients BAK-C12 in combination with latanoprost as claimed in the instant application would produce a colorless and transparent composition.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ZOHREH A. FAY whose telephone number is (571)272-0573. The examiner can normally be reached on Monday to Friday 9:30-6:00.
